I N S P I R A T I O N

At Archer's Hall Design Centre, we practice interior design by combining your personal style and our experience, skill and resources to create your tropical dream home.

We ensure that all aspects are taken care of in this process. We look after every detail in each step, including furniture selection, ordering, shipping, customs and brokerage services and installation. Each step is given the highest priority and care as we are extremely conscientious of providing our clients with a professional service.

We can provide you with the creative concept, working floor plans, fully illustrated story boards and above all, talented and knowledgeable designers to guide you every step of the way. This helps to make life easier for our many clients who live off-island and can find the process of handling the interior design and furnishing aspects of their home challenging. We have a resource and meeting room to allow our clients to work from our extensive range of catalogs and fabric selections in comfort. Our clients also have the benefit of browsing our retail store that shows many design concepts as well as allowing them to see the quality of goods that we offer.
